

Electronic Health Records

The HITECH Act sets forth requirements and provides incentives for healthcare organizations to convert to EHR, but...

Converting to EHR is a huge challenge for many small healthcare providers. **ATIBA can help!**

Governance, Risk & HIPAA Compliance

Protecting confidential patient information needs to be a key priority for all adopters of EHR. The HITECH Act explicitly establishes additional privacy and security rules and HIPAA compliance requirements have been strengthened. Compliance auditing will become more commonplace and penalties for non-compliance will be substantial.

Compliance with HIPAA is now required for all covered entities *and business associates* (meaning 3rd parties who may support you). Additionally, Stage 1 "meaningful use" requires providers "protect electronic health information maintained using a certified EHR technology through the implementation of appropriate technical capabilities". The measure of that objective is to "conduct or review a security risk analysis in accordance with the requirements under 45 CFR 164.308 (a)(1) and implement security updates as necessary". Therefore, it is critical that regular IT security & HIPAA risk assessments be conducted to mitigate business risk.

HITECH Act

Physicians can earn between \$44,000 and \$64,000 over 5 years if they are using EHR in 2011 – leverage existing incentives NOW!

- Those who adopt first will benefit the most
- Late adopters will receive significantly less
- Providers can receive incentives under only one program (Medicare or Medicaid)
- 2015: reductions in Medicare and Medicaid fees for those who do not adopt EHR
- Step 1 – Implement EHR
- Step 2 – Prove "meaningful use"

ATIBA - CHIEF COMPLIANCE OFFICER FOR YOUR HEALTHCARE PRACTICE

ATIBA has the knowledge and expertise to help you select the best EHR solution for your practice, within the constraints of your budget. Our consultants have extensive experience helping organizations assess, select and implement the technologies that support their business requirements. Allow us to support you with an end-to-end EHR solution. We will provide unbiased guidance throughout the software selection process, manage implementation of the solution, provide customized, on-site training for your staff and best of all – we are here as your local, long-term business partner to provide on-site assistance and support.

flexible EHR solutions for your healthcare practice

HEALTHCARE TRANSFORMATION

Converting to electronic health records can be overwhelming for many small healthcare organizations – just where do you start; who do you trust? Let the IT experts at ATIBA guide you on your healthcare transformation journey. We understand technology and the importance of selecting a solution that meets the unique needs of your practice; a solution that is flexible, easy to use, and capable of growing with you.

ON-SITE EHR SOLUTIONS

Internal networks support client/server EHR and Practice Management applications – you have complete control. ATIBA will help you clearly document your requirements, define your workflows and manage the cultural change that goes along with converting from paper-based medical records to electronic records. We'll work with you to ensure that the appropriate security and communication protocols are in place for the safe exchange of electronic health information.

HOSTED, WEB-BASED SOLUTIONS

Enjoy the best of both worlds – comprehensive and flexible Practice management and EHR solutions without the burden of procuring and managing the IT infrastructure to support them. You focus on your core competency – healing the sick! Let the IT experts focus on maintaining the underlying infrastructure.

Solo and small group practices can enjoy all the benefits and advantages previously enjoyed by larger healthcare organizations.

- Reduce total cost of ownership
- Reduce high start-up costs
- Reduce the long-term burden of managing an IT infrastructure
- Access your EHR and Practice Management applications from anywhere, anytime
- Highly secure, HIPAA compliant environment supports business continuity plans

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?
