ATIBA - Application, Technology Information & Business Advisors

ATIBA - Special Offer

FREE 'Shades of Green' Presentation

'Green' your office and I.T. operations in order to reduce your energy consumption and costs.

In an effort to make an ecological difference in the local community, ATIBA will give a free on-site presentation to the first 10 businesses that contact us before September 30th, 2009.

ATIBA's 'Shades of Green' presentation discusses the benefits of 'greening' your office and I.T. operations, provides some 'quick hits' that will help you reduce energy consumption and save money, and will give you advice on how you can move forward in developing green practices within your organization.

Take the Challenge

Operate in the 'Green Zone' - Save Money, Save Energy, Save the Planet!

'Green' your office and I.T. operations in order to reduce your energy consumption and costs.

Eco-consciousness means using every asset wisely. Opportunities exist within all organizations to increase energy efficiency, cut CO₂ emissions, decrease waste and save money.

Take the ATIBA 'Green Earth' Challenge - Make the Pledge

"I pledge that my company will implement policies and procedures that will reduce the impact our business operations have on the environment, reduce our carbon footprint and help keep our earth green."

The ATIBA 'Green Earth' Challenge

Go Green - Save Money - Save Energy - Save the Planet!
Take the Pledge!

Corporate Environmental Responsibility

As a recent member of the The Greater Scranton Chamber of Commerce I'd like to take this opportunity to introduce you to ATIBA Technology Solutions, a local business and technology consulting company. We have provided high-value, creative solutions to businesses around the world and are hoping to do the same for local businesses.

Corporate environmental responsibility is suddenly at the top of the priority list for many organizations. Stakeholders are putting pressure on businesses to develop policies that are not only good for business, but are also good for the planet.

ATIBA's 'Green Zone' framework transforms your business to 'think green, work green' and reduce operating costs in the process. We'll help you determine the 'shade of green' that is right for your business. Our framework will help you develop an effective environmental policy that when leveraged appropriately will increase energy efficiency, reduce waste and provide opportunities for cost savings.

The ATIBA 'Green Zone' Framework

- Corporate Environmental Strategy - defines your strategy, vision, objectives
- Program Charter - to structure and define your 'Green Zone' initiative
- Carbon-footprint Assessment - to establish a baseline
- Implement Green Business Practices - to reduce consumption and save money
- Educate and Communicate - internally and externally
- Measure Progress - establish metrics and reporting
- Continuous Improvement - establish policies and practices for long-term 'green' business sustainability

Contact Us

To discuss how ATIBA's 'Green Zone' business transformation framework can help you save money and help save the planet, contact Anita Rose, President of ATIBA Technology Solutions at 570.842.8144 or via email arose@atibatechnology.com.

We who live and work in NE Pennsylvania are proud of our natural resources. Let's make sure they remain clean, green and environmentally healthy long into the future.

Become a leader in the ecological revolution by transforming your business today - take action - accept the ATIBA 'Green Earth' Challenge to Go Green!

Save Money - Save Energy - Save the Planet!
